

# ProSensia Internship Report

## Day 2 – HTML Practice on W3Schools

**Name:** Hamza Rafique

**Father's Name:** Muhammad Rafique

**Date:** 24-06-2025

---

### Objective

The objective of Day 2 was to reinforce the HTML concepts learned on Day 1 through hands-on practice. By using the W3Schools online editor, I aimed to apply and test each HTML tag in real time to understand their structure and behavior more effectively.

---

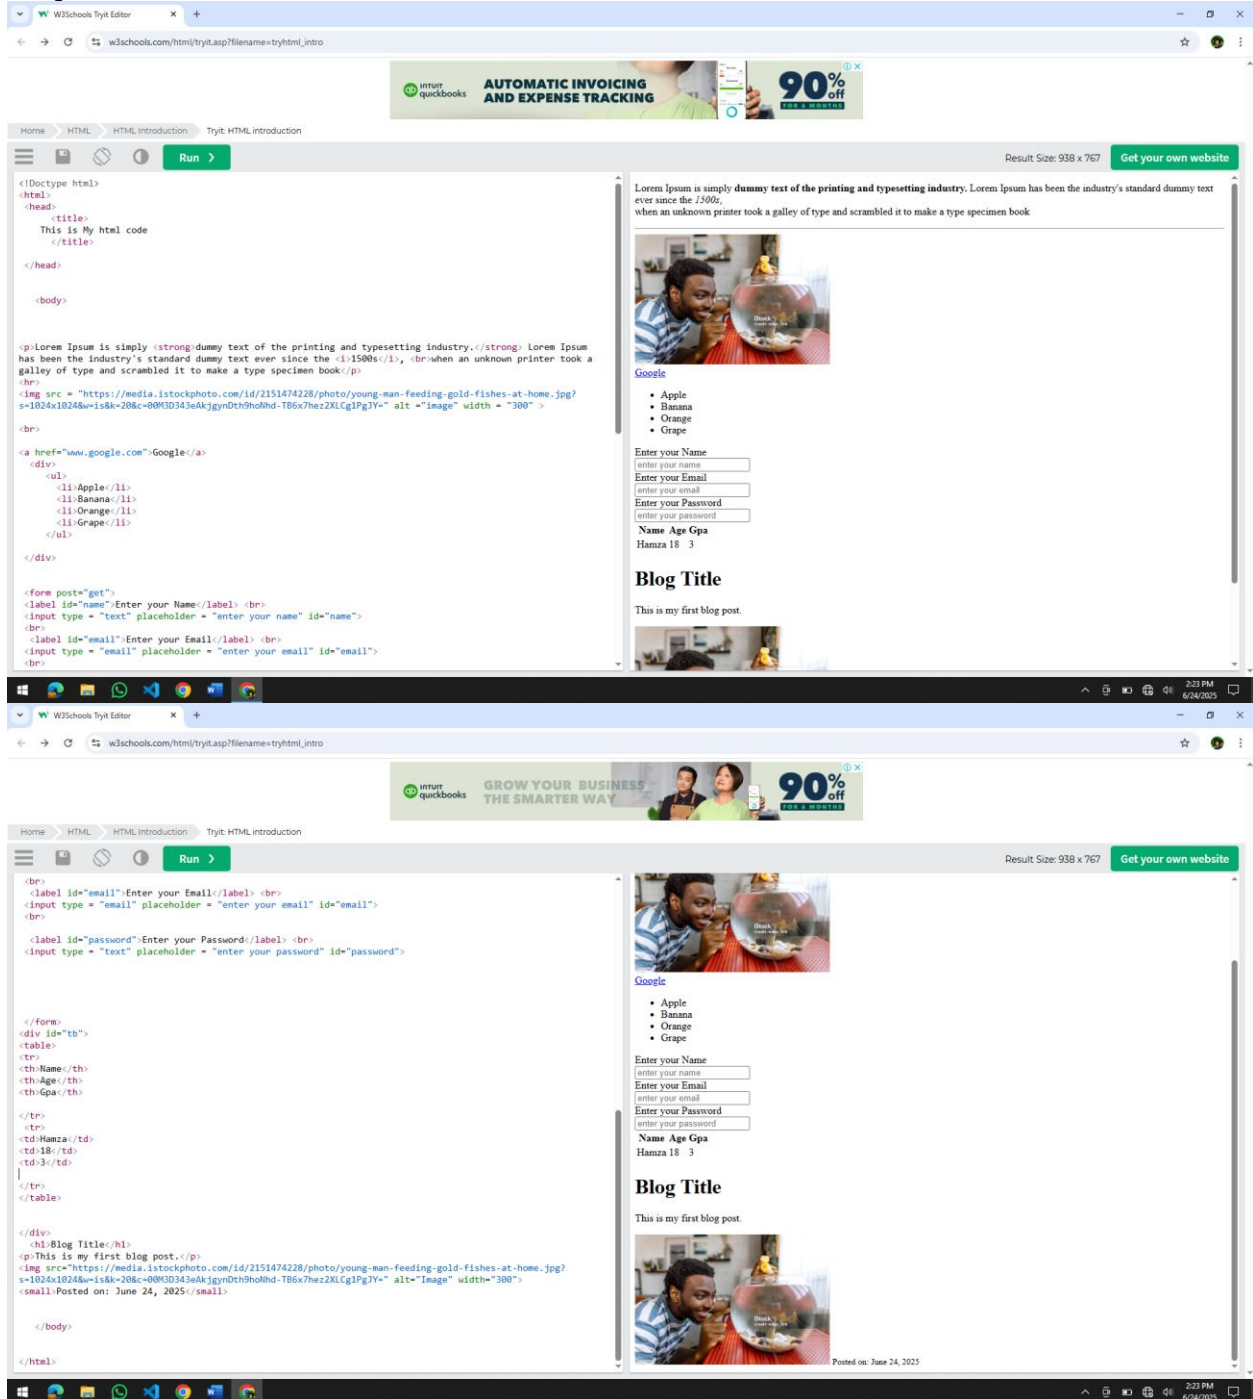

### Activities Performed

Today, I practiced all the HTML topics covered on Day 1 using the **W3Schools Try-It Editor**. This allowed me to instantly see the output of my code and correct any mistakes. Topics practiced include:

- 1. Basic Structure of HTML Page**
  - Practiced writing full HTML pages using `<!DOCTYPE>`, `<html>`, `<head>`, and `<body>` tags.
- 2. Paragraphs and Line Breaks**
  - Used `<p>` for paragraphs and `<br>` for line breaks.
- 3. Headings and Text Formatting**
  - Applied `<h1>` to `<h6>`, and used `<b>`, `<i>`, `<u>` for styling text.
- 4. Links and Images**
  - Created clickable links using `<a href="">` and embedded images with `<img>`.
- 5. Lists**
  - Practiced both ordered (`<ol>`) and unordered (`<ul>`) lists with list items `<li>`.
- 6. Horizontal Lines and Divs**
  - Used `<hr>` to separate content and `<div>` for grouping elements.
- 7. Forms**
  - Built basic forms using `<form>`, `<input>`, `<label>`, and `<textarea>`.
- 8. Tables**
  - Designed simple tables using `<table>`, `<tr>`, `<td>`, and `<th>`.
- 9. Blog Layout Practice**

- Combined tags to create a basic static blog layout with sections for title, content, and sidebar.

## Output:

## **Conclusion**

Day 2 was focused on practical implementation. I used the W3Schools Editor to apply each HTML tag and structure learned previously. This hands-on approach helped strengthen my confidence in HTML and gave me a better understanding of how content is rendered in a web browser. I am now comfortable with writing and debugging basic HTML code.
