

## **Internship Report – Day 5**

**Internship Title:** Web Development Internship

**Company:** ProSensia

**Date:** [6-27-2-25]

**Name:** Hamza Rafique

---

### **1. Objective:**

The objective of Day 5 was to revise previously learned HTML and CSS concepts and implement them in a practical project by designing a basic website structure with multiple sections.

---

### **2. Activities Performed:**

- Revisited all previous topics, including basic HTML structure, tags, and CSS styling.
  - Applied the knowledge to create a simple multi-page website layout.
  - The website includes the following navigation tabs:
    - **Home**
    - **Projects**
    - **Services**
    - **Feedback**
    - **Learn More**
  - Structured the content using semantic HTML elements.
  - Used CSS for layout, styling, spacing, and hover effects.
- 

### **3. Tools & Technologies Used:**

- **HTML5**
- **CSS3**
- **VS Code**
- **Live Server Extension** (for real-time preview)

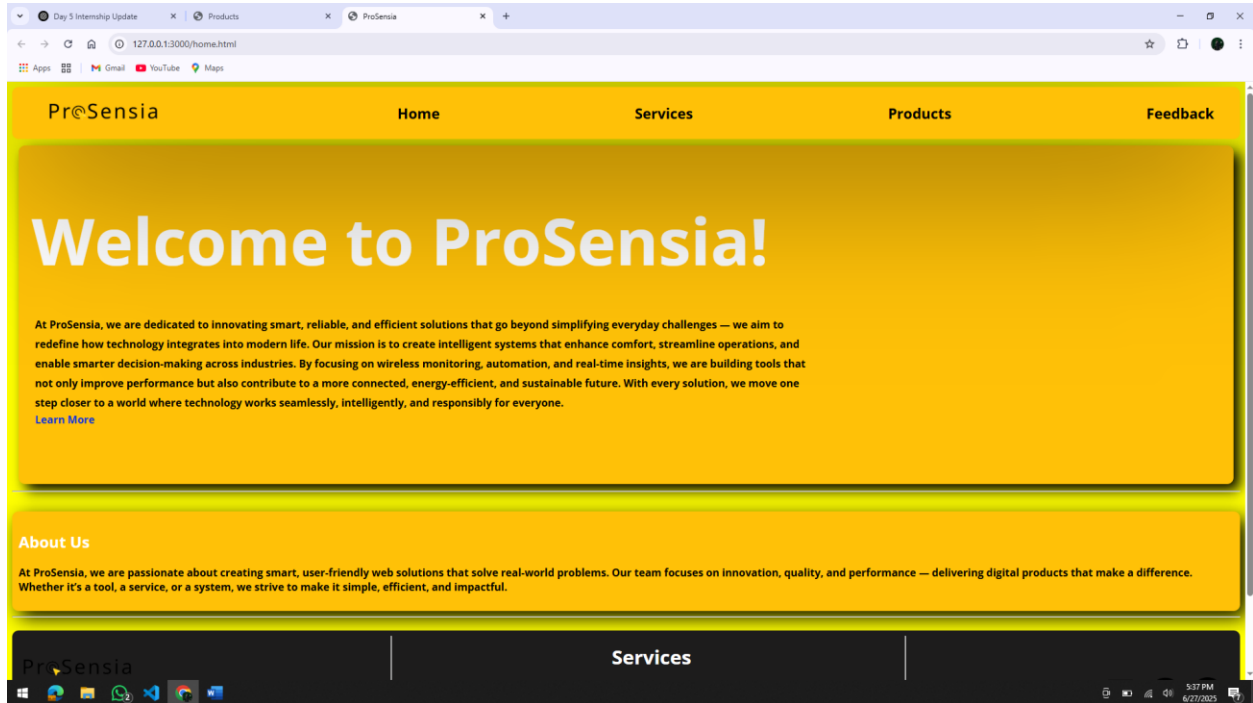

---

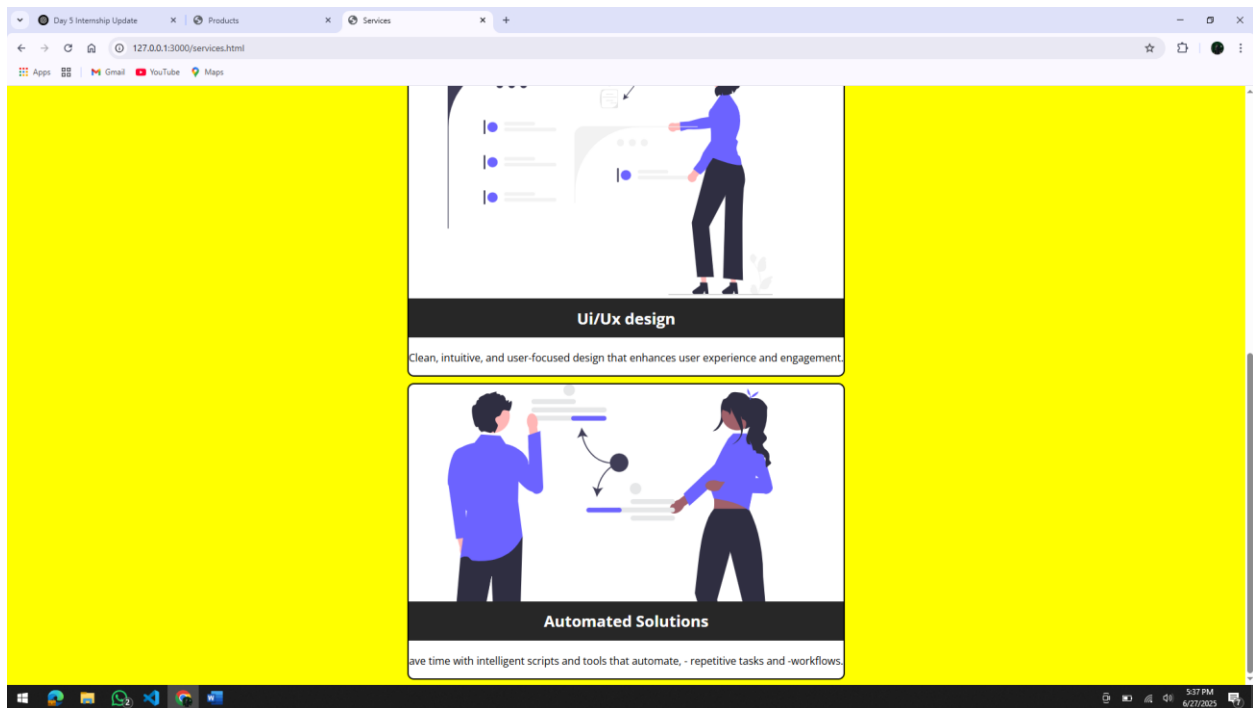

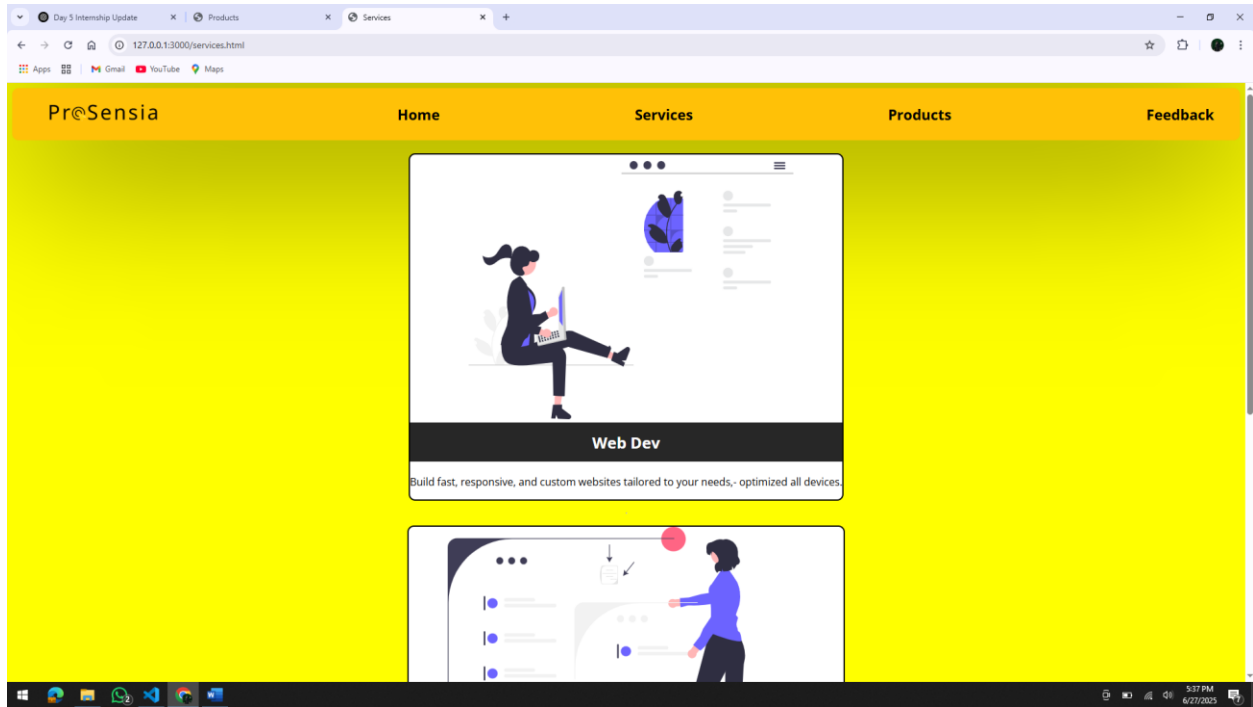

#### 4. Output:

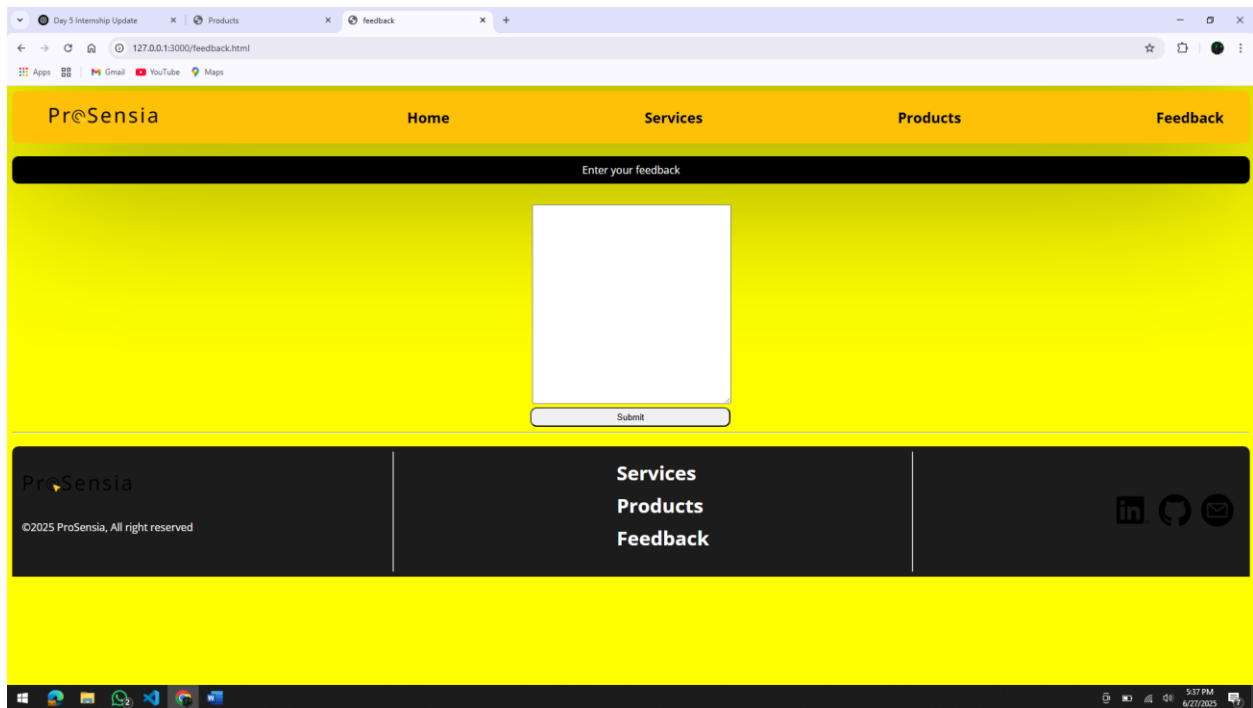

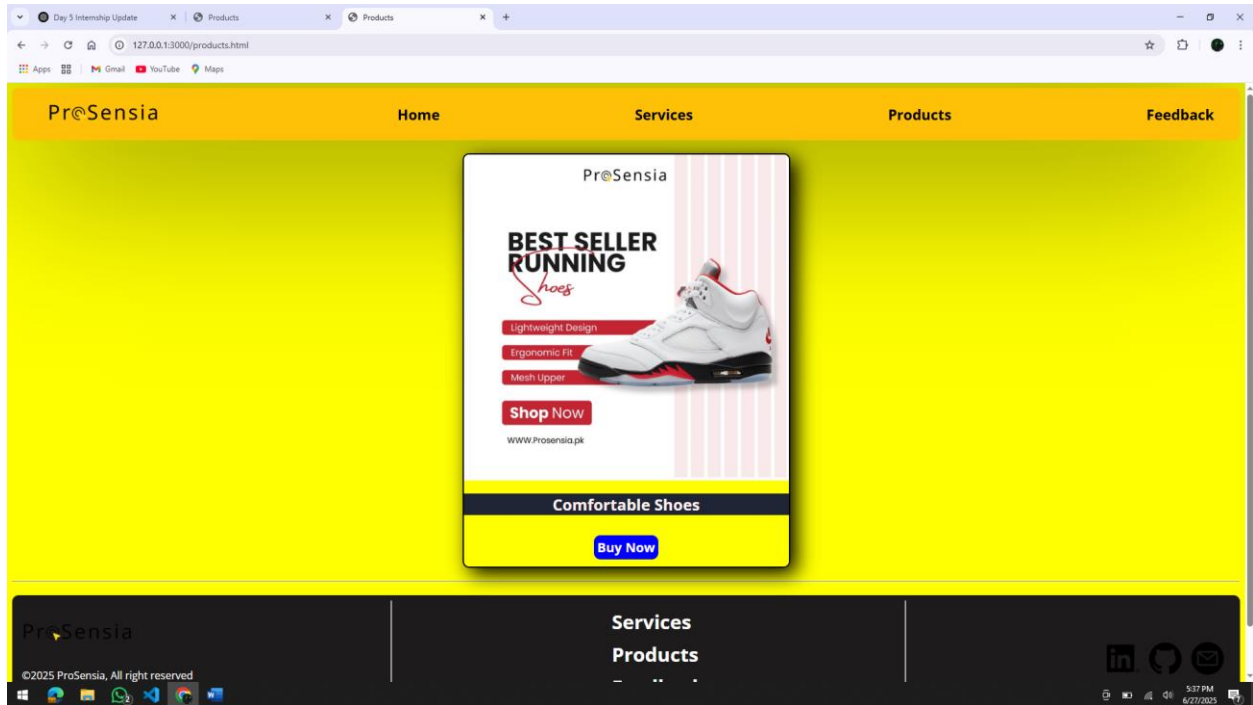

A functional and responsive website layout with basic styling. The navigation is clear, and each section is distinct, demonstrating the effective use of HTML and CSS fundamentals.

---

#### 5. Screenshot of the Website:

## **6. Conclusion:**

Day 5 was productive and helped strengthen understanding by revising core web development concepts and applying them practically. It also improved my confidence in building structured website layouts from scratch
